Subject Index

A value 341
Acacia albida 341
– *auriculiformis* 261
– *mangium* 261
Acetylene reduction assay (ARA) 315, 330
Acid rain 178
– soils 43
Acidification 205
Activity densities 182
Aerenchyma 215
Agaricus bisporus 290
Age-hardening 163
Aggregate stability 163
Agroforestry 37, 261
Agro-ecosystems 152
Air-filled porosity 215
Air pollution 174
Algalization 235
Alnus glutinosa 321
Amino acids 335
Ammonia volatilization 31
Antibiotic resistance 257
Aphelenchoides 205
Aporrectodea caliginosa 163
Artificial soil cores 152
Association 321
Assulina-Valkanovia 95
Atmosphere-derived N 25
Atriplex spp. 315
Australia 110
Availability 211
Available C 19
Axenic seedlings 281

Bacterial biomass 205
Barley 168
Basal respiration 273
Beech wood 292
Bioactivity 78
Biodegradation 14
Bioindicators 182
Biological farming 182
– monitoring 192
– suppression 231
Biology 93
Biomass 19
– production 321
Blue-green algae 235, 239
Bradyrhizobium japonicum 330
Bradyrhizobium spp. 261

Cajanus cajan 49
Carabids 182
Carbohydrase 139
Carbohydrates 19
Carpophore formation 290
Casing 290
Cassia siamea 341
Casts 163
Causal connections 168
Cellulose decomposition 301
Central Himalayan forests 245
Cephalcia abietis 174
Chitin degradation 126
Chitinolytic 268
Chlorpyrifos 14
Chromosomal polymorphisms 119
Chromosome banding 119
– numbers 119
Clay 306
– minerals 199
Cognettia sphagnetorum 159
Collembola 119, 126, 130, 145, 178, 203
Colpodidae 110
Colour-marked food 203
Community structure 130, 301
Competition 178, 330
Contaminants 281
Cryptostigmata 130
Cucumis sativus L. 231
Curtobacterium spp. 126
Cutting 37
Cyanobacteria 239

Dehydrogenase activity 14
Denitrification 1, 31, 61, 71, 215, 252, 283
Deuteromycetes 245
Dianthus lumnitzeri 130
Dicyandiamide 220
Differential scanning calorimetry 188
– thermogravimetry 188
Diffusion/reduction model 71
Dispersion index 163
Diversity 245

Earthworm casts 288, 290
Earthworms 163
Ecology 93
Eisenia fetida 288
Elaeis guineensis 43
Element content 192
Enchytraeidae 152, 159
Endoparasite 174
Enterobacter agglomerans 315
Entomophilie nematode 174
Enzyme activities 239
Ergosterol 78
2-Ethynylpyridine 252
Etridiazole (Dwell) 252
Eucalyptus grandis 341
Evolution 95, 110

Feeding 101
Fertilization level 182
Fertilizers 43
Flooded soil 1, 61, 283
Fluorescent pseudomonads 226
Folsomia candida 126
Fonofos 14
Food perference 139
– selection 203
Forage legumes 54
Forest rehabilitation 341
Fulvic acids 19
Fumigation method 19
Fungal communities 245
– hyphae 163
– species 101
Fungi 203

Genotypes 95
Gigaspora margarita 311
Glomus etunicatum 54
– *intraradices* 54
– spp. 43, 311
Glucosamine 78
Gram-negative bacteria 257
Green manure 68
– manuring 235
Growth rate 101

H_2 transfer 301
Habitat 139
Heavy metal pollution 192
Holocellulose 188
Hordeum distichum 168
HPLC 335
Humus-enzyme complex 199

Inoculation 311, 330
Interlayer ammonium 211
Immobilized protease 335
Ips typographus 192
Isopoda 145
Isotope dilution 341

Karyotype evolution 119
Kinetic parameters 199
Kuehneltiella terricola gen. nov., sp. nov. 110

L-^{14}C-leucine 288
Leucaena leucocephala 37, 68, 341
Lettuce 288
Lignin 188
Lime 78
Liming 205
Litter decomposition 188, 245
Loss-on-ignition 306
Lucerne 168

Macronutrients 145
Methods of C extraction 19
Microarthropods 139, 178
Microbial activity 145
– biomass 168, 239, 273, 292, 301
– succession 301
Microflora 292
Microorganisms 168
Microsites 71
Mineralization 159
Mites 139
Muramic acid 78

Natural ^{15}N abundance 25
N distribution 37
– fertilizer 220
– immobilization 220
– uptake 37, 68
– -difference method 25
^{15}N 1, 61
– balance 61
– -balance method 31
– isotope 37
– isotope dilution method 321
N_2 fixation 25, 37, 321
Neemcake-coated urea 235
Nematoda 205
Nematodes 83
NH_3 volatilization 283
Nitrapyrin (N-Serve) 252
Nitrate 211
Nitrification 283
– inhibitor 220
Nitrogen 1, 159
– fertilization 168
– fixation 261, 315
– fixing trees 341
– loss 283
– transformations 283
– turnover 211
Nodule efficiency 261
Nodule occupancy 330
Non-nodulating genotype 25
Nothrus silvestris 139
Notillage 135, 220
Nutrient cycling 83

Oil palm 43
Oligotrophs 226, 231
Organic carbon 306
– matter fractions 335
Oryza sativa L. 1, 61, 68

Peptides 335
Pentachlorophenol 292
Pesticides 292
Philoscia muscorum 145
Phorate 14
Phosphatase activity 199
Phosphatases 14
Phosphorus 43
– fertilization 54
Phospholipid fatty acids 226
Phryganella acropodia 101
Picea abies 78, 174, 205
Pigeonpea 49
Pine roots 268
Pinus nigra 145
– *sylvestris* 205, 268
Plant cushion 130
Plasmid 257
Platynothrus peltifer 139
Polymorphism 95
Populus nigra 321
Potato fields 182
Prilled urea 235
Primary production 168
Prostigmata 135
Protein synthesis 288, 290
Proteolytic activity 268
Protozoa 83
Pseudo-equilibrium 71
Pseudomonas spp. 231
Pythium damping-off 231

Quercus leucotrichophora litter 245

Radish 288
Regression 306
Rhizobiophage 330
Rhizobium spp. 37, 261, 341
– variation 49
Rhizopoda 101
Rhizosphere 83, 215, 268
– pseudomonads 226, 231
Rice 215
Root-associated diazotrops 315
Rootstock 311

Saline sodic soils 315
Salinity stress 49
Saturation extract 199
Selective media 226
Sesbania aculeata 235
Soil 78, 126, 268
– acidification 178
– acidity 174
– aggregation 239
– animals 93, 159, 168
– bacteria 257
– biologist 93
– ciliates 110
– enzymes 335
– fauna 152, 203
– fungi 205
– inoculation 239
– mites 135
– moisture 135, 159
– moisture content 273
– nitrogen 239, 335
– organic matter 306
– structure 152
– temperature 273
Soluble enzymes 199
Spatial and temporal variation 71
Sphagnum 95
Springtails 178
Spruce forest 95
Starvation 139
Steinernema kraussei 174
Sterile plant selection 281
Streptomycetes 268
Substrate-induced respiration 19, 273
Substrate quality 245
Succession of microorganisms 145
Surface sterilization 281
Symbiosis 126
Symbiotic nitrogen fixation 49
Systematics 110

Taxonomy 93
Temperature 159
Terbufos 14
Testate amoeba 101
Tetacea 95
Tomocerus minor 145
Transposon 257
Tree legumes 261
2,4,5-Trichlorophenoxyacetic acid 292
Trifolium pratense 281
– *repens* 281
Triticum aestivum 281
Troyer citrange 311
Trypodendron lineatum 192

Ultrastructure 101
Urea 1, 31, 61, 211, 283
Urea hydrolysis 252

Vertical distribution 130, 135
Vesicular-arbuscular mycorrhizae 43, 54, 311
Voucher specimens 93

Wetland rice 1, 61, 68, 235
– soils 31, 301
Wheat 211, 215

Xanthomonas maltophilia 126

Yield 54, 68

Zea mays L. 220
